

## Step 1: Text-to-Temporal Graph Translation

**Context:** Once upon a time in the quaint town of Weston, a baby boy named John Thompson was brought into the world in the year 1921. Growing up, he had a vibrant spirit and an adventurous soul. ...

**Keyword:** Life story of John Thompson

## Step 2: Temporal Graph Reasoning

**Question:** True or false: event (John Thompson owned Pearl Network) was longer in duration than event (Sophia Parker was married to John Thompson) ?

### Solution:

The duration for each event can be calculated as follows:

(John Thompson owned Pearl Network)  
starts at 1942, ends at 1967  
 $1967 - 1942 = 25$

(Sophia Parker was married to John Thompson)  
starts at 1947, ends at 1953  
 $1953 - 1947 = 6$

25 is greater than 6, thus, the answer is **True**.
